A. Personal Statement

As an experienced anesthesiologist I founded Pain society of Mongolia in 1995, and my Phd research was pediatric day surgery's pain management. In 1993, we created pain management team at Children's hospital for preoperative and postoperative pain. In Mongolia, we do not have enough pain specialist and only there is just one hospital has a pain clinic. Also there is no research for pain management. There for I want to train doctors for pain management in Ulaanbaatar city and other provinces. And I want to organize pain conference for doctors, who interested in acute and chronic pain to get award.
